

WCP Highlights

Production of bituminous coal and lignite in the week ended February 4, 1984, as estimated by the Energy Information Administration, was 17,459,000 short tons. This was an increase of 675,000 short tons, or 4.0 percent from production in the previous week. Production in the corresponding week of 1983 was 14,535,000 short tons. Bituminous coal and lignite production from January 1 through February 4, 1984 totaled 78,909,000 short tons, 6.9 percent above production in the same period of 1983. Bituminous coal and lignite production in January 1984 totaled 67,875,000 short tons, an increase of 9.7 percent over production of 61,850,000 short tons in January 1983.

Production of Pennsylvania anthracite in the week ended February 4, 1984, as estimated by the Energy Information Administration, was 87,000 short tons, an increase of 3,000 short tons or 3.6 percent from production in the previous week. Production in the corresponding week of 1983 was 65,000 short tons. Anthracite production from January 1 through February 4, 1984 totaled 394,000 short tons, 26.7 percent above production in the same period of 1983.

Energy Information Administration Weekly Coal Production

Weekly Coal Production provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports, and exports, and related supply and demand data are provided as they become available.

Weekly Coal Production is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in Coal Distribution (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and Coal Production Annual (Form EIA-7a).

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or necessarily reflecting any policy position of the Department of Energy or any other organization.

This publication is available on an annual subscription basis from the Superintendent of Documents, U.S. Government Printing Office.
